

RUSLUG - General Interest Meeting

Rutgers University Student Linux User's Group

March 7th 2024

What is this?

- Community to share, learn, and discuss free software
- A space for tech enthusiasts without the existential dread of soulless career talk

Our Core Values

- **Inclusivity:** We welcome everyone regardless of tech knowledge
- **Freedom:** We advocate for all user rights as described by the Free Software Foundation
- **Collective Ownership:** We have an eboard just for the sake of the books, everyone should feel like they have a stake in the club.

Events

- **Workshops/Demos:** Presentations from fellow members showcasing tech they're passionate about
- **Installfest + Keysharing Party:** Install Linux together, exchange pgp keys, talk to fellow members
- **Discussions:** Hate systemd with a passion? Need somewhere to soapbox about Gentoo? this is the place to do it (in moderation)
- **Guest Speakers:** Imagine getting Stallman in here lmao
- **Game Nights/LAN Parties:** We can play Xonotic/Quake the old school way! (feel free to suggest other games)

Future Initiatives

- **Hackathon/Editathon:** Contribute to free software overnight
- **e-waste fleet:** Repurpose e-waste computers by offering a fleet to new users to try out and experience linux, and follow the workshops
- **Collaboration with non tech clubs:** spread awareness of free software to those not interested in technology

Executives (for the books)

President - Mannan Shukla

- Class of 2026, CS Major
